In the admin documentation for firmware 1.0.1.0 (linked below) it clearly states under Configuring Local Logging (page 148): "The router can be configured to log and e-mail notifications for denial of service attacks, general attack information, login attempts, dropped packages, and so on, to a specified e-mail address or a Syslog server."

RV220W - Logging Configuration Question - Cisco Community

The RV220W require remote management to be on port 443 or 60443. Aside from this, the QVPN is as simple as the PPTP in the sense, you create a user, specify the user type as QVPN. As far as 3rd party clients, I personally don't have a prepared documentation for the setup (I'm not at work!).
